

Notes: Component Functions

- a.) Prevents water entry into occupied spaces.
- b.) Provides a thermal envelope.
- c.) Provides primary drainage to cast drain basins.
- d.) Serves as a base for final architectural features and/or final load bearing wear slab.
- e.) Provides expansion/ contraction space for movement during seasonal thermal cycles; secondary flow path.
- f.) Resists wear slab movement from expansion.
- 1.) Serves as a "finished" wear slab surface with or without snowmelt.
- 2.) Paver surface over slag setting bed; with or without snowmelt in setting bed.
- 3.) Supports/maintains vegetation growth; irrigation optional.

PLAZA DECK SYSTEM - GENERAL CONCEPT
